Add Remediation Questions

Remediation Questions allow you to set a high passing standard while giving your employees a second (and even third) chance to provide a correct answer.

Following Alchemy's instructional design, Remediation Slides review information from the previous section, and Remediation Question Slides allow you to re-phrase the question.

Step 1: Insert Remediation Question Slide

- A. Highlight the Question Slide that requires a Remediation option
- B. From the **Alchemy Creator** tab, select **Remediation Question Slide**
 - Must immediately follow a Question Slide
 - Includes one instructional Remediation Slide (more can be added) and one Remediation Question slide

Step 2: Build the Remediation

- A. Build the Remediation slide, just as you would a Point Slide
 - Select the **Remediation Slide** button at the top to add more slides
- B. Build the Remediation Question slide, just as you would a Question Slide
 - Only one Remediation Question is created per Question Slide
 - Player can be set to play the same Remediation Question twice
