Export and Preview a Course

A course must be exported for it to be playable. The exporting function will generate a self-contained file that may then be added into Player and eLearning.

Export a Course

A. Click **Export** from the Creator Ribbon

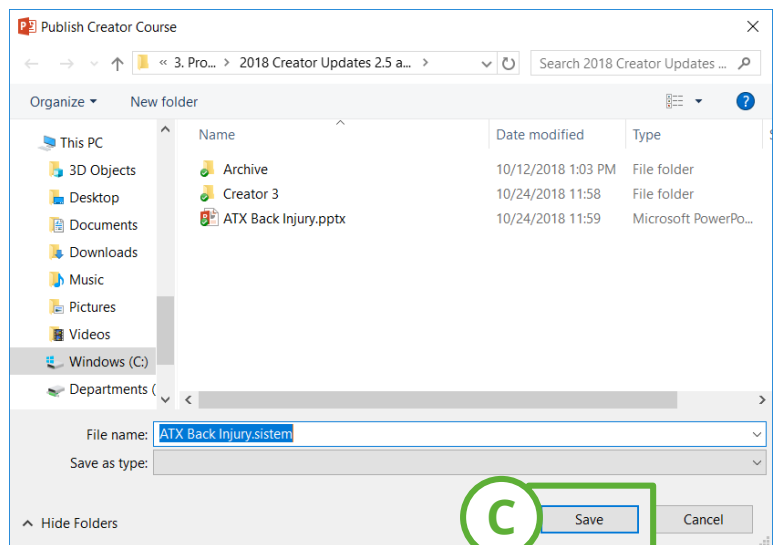

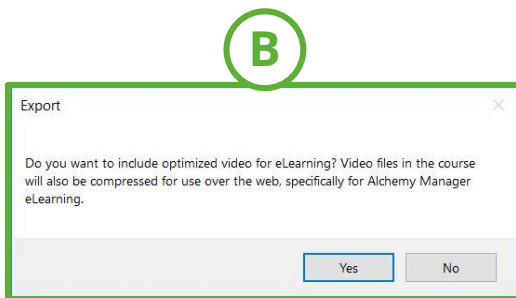

B. Choose eLearning video option

- Only appears if your course contains a video
- Yes: File will contain both full-sized Player version and compressed eLearning version
- No: File only contains full-sized Player version

C. Save the file

- File name will default to the PowerPoint name with the .sistem extension
- Only alphanumeric characters and underscores
- No special characters or spaces

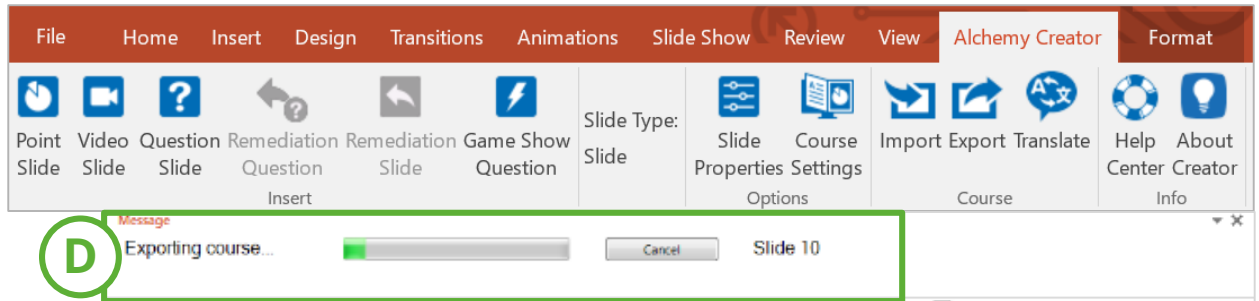

Creator

Export and Preview a Course

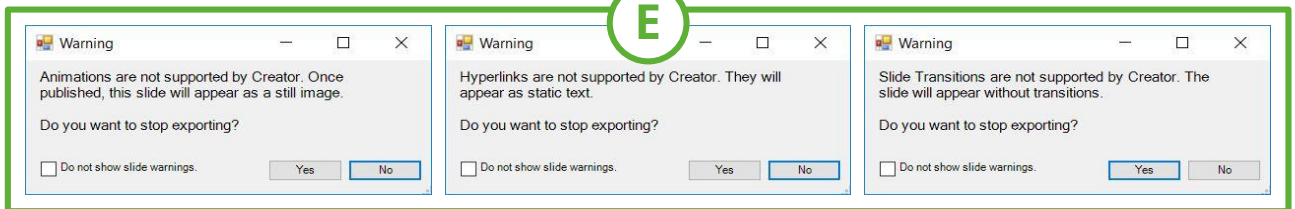

Export a Course, continued

D. The file will begin exporting

E. Warning pop-ups: **Slide Transitions / Animation / Hyperlinks are not supported by Creator**

- **No:** Allow Creator to continue exporting with still images and static text
- **Yes:** Stop publishing; remove the slide transitions / animations / hyperlinks manually
- **Do not show slide warnings:** if you have a number of these elements

F. Preview Course

- Runs automatically
- Click on the Menu button in the upper-right corner to navigate through the preview
