## Manual and Automatic Advance Options

The default settings for slide advance options will change when audio and video are added to a slide. Selecting the Manual Advance option in Slide Properties affects only that slide; **selecting the Manual Advance option in Course settings applies that setting to the entire deck.**

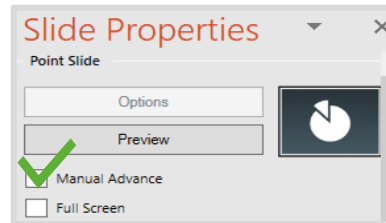

### These items must be advanced *manually*:

- Point slides with **no voice-over**
- Remediation slides with **no voice-over**

### These items advance *automatically*:

Slides in **green** can be set to Manual Advance in the Slide Properties tab

- Video slides
- Game Show slides
- **Point slides with voice over**
- **Remediation slides with voice-over**
- **Question slide components**

### Need the entire deck to advance manually?

Use the Manual Advance option in Course Settings
