

# Creator

## Set Creator Content Admin

Customize and translate Alchemy courses using Creator. Editable content is available through a login-enabled download function.

**This administrative role is for downloading and editing Alchemy content ONLY. All other Creator tools, including Translate, do NOT require this level of access.**

### Creator Content Administrative Level

In order to Import and Edit Alchemy Content in Creator, the user must have **Creator Content Admin** access level. Diamond Admins, Alchemy Client Support, and your Account Manager can assign this access level.

This administrative access level can be independent of other access levels (e.g. an Admin User may only have the Creator Content Admin access) and can also be selected with other access levels (e.g. a User can be a Coach, Creator Content Admin, and a Supervisor-Developer).

### From Manager:

- A. Access **Admin Listing** and select the user
- B. Choose **Creator Content Admin**
- C. Select **Update Admin** button
