

# Creator

## Translate Creator Content

Creator as a built in translating tool powered by Google Translate. This tool can be used on Alchemy Content and purely company specific content.

### Translations powered by Google Translate

Alchemy has partnered with Google to create our translating tool to provide a quick machine translation. Keep in mind Google Translate is the starting line, not the final destination. It's important to remember the following:

- Have a fluent subject matter expert review translated materials
- Know the same phrase may translate differently as the translator improves
- Double translation are not recommended!
- Series of capitalized words may be skipped – check for translations

### What information is translated?

**Only Creator fields are translated with this feature.**

Text on the PowerPoint slide will **not** be translated with this tool; however, you may use the PowerPoint translate tool in the Review tab for the slides themselves.

## Translate Creator Content

This tool jump-starts the translation process, you can start with an **existing presentation** or **imported Alchemy content**. Please have a fluent speaker review the translations.

**NOTE: Only Creator fields are translated, not the slide itself.**

### Step 1: Log in to access Translate function

- A. From the Alchemy Creator, select **Translate**
  - If prompted, accept the End User License Agreement (EULA)
- B. Sign in to Alchemy Manager (first time only):
  - **Customer Name:** If your Alchemy Manager website is <https://www.sistemlms.com/tastyfoods>, your Customer Name is “tastyfoods”
  - **Username and Password:** Same as your Alchemy Manager website login
  - **Store login information:** Select to save your login for future downloads

# Creator

## Translate Creator Content

This tool is meant to start the translation process. Please have a fluent speaker review the translations.

### Step 2: Translate Content

- A. Select the **From** (original) and **To** (translated) languages
- B. Select **Translate**; PowerPoint will autosave another document with the language in the title
  - Ex: ATXBackInjury\_translated\_vi.pptx
- C. Translated text will be in the Course Setting and Slide Properties
- D. Select **Preview** to see translation
