

If a problem occurs during training, Player may run a test to verify connectivity to Manager.

USING NETWORK DIAGNOSTICS

- A. Open **Admin Settings**
- B. In the Hardware Devices section, select **Network Diagnostics**
 - May be asked for the Admin password (default: alchemy)
- C. Click **Send Data** to send configuration information to Alchemy
- D. Click **Run** to test if data is being communicated properly from Player to Manager.
 - Player will display the status of the test, test, and will confirm when the test has been completed.
