

Video captions are available on Player 7+. This will allow you to enable closed captioning on Alchemy Activities in Player and Kiosk Mode. Captions will display on content slides.

## Enabling Video Captions

- A. In Player, open Admin Settings
- B. Select **Display Settings**
  - Enter password if prompted (alchemy)
- C. Select **Enable Video Captions**
- D. Click **OK** to save

Video captions are available on Player 7+. This will allow you to enable closed captioning on Alchemy Activities in Player and Kiosk Mode. Captions will display on content slides.

## Video Captions vs. Sub Titles

What is the difference?

### Video Captions

- Used on full screen videos (i.e., intro videos in Alchemy courses)
- Displays the *closed captioning* text that corresponds with the language selected for the course
  - E.g.: Course language is set to English, video captions will appear in English
- Displays at the bottom of the screen
  - NOTE: If using subtitles, captions will appear at the top of the screen
- Video captions are **off** by default

### Subtitles

- Displays the *translated* text selected for that course
  - E.g.: Course language is set to English with Spanish subtitles
    - Narration is in English.
    - Subtitles will appear at the bottom of screen in language selected

## Video Caption Best Practices

Video captions are designed to aid in training, but may not always be necessary. Please follow the best practices below.

### Enable video captions when:

- An employee is hearing impaired or has requested captions
- You need to *assist* those whose primary language is not the language used in the training

### Enable subtitles when:

- You need to *provide a translation* for those whose primary language is not the language used in the training

***Alchemy does NOT recommend using both subtitles and video captions at the same time***
