

# SCORM Content Review

## Definition

SCORM is the technical, under-the-hood language that allows one platform to share content with another platform. Stated another way, consistently following that Reference Model – the technical specifications - is what makes the content shareable – viable – across different eLearning platforms.

## What Alchemy supports

Alchemy supports eLearning content that follows the standard of **SCORM 2004, 3<sup>rd</sup> Edition**

## Standard Publish Settings

- SCORM 2004, 3rd Edition
- Determined passing designation by
  - Viewing all slides, or
  - Passing any associated quizzes
- LMS Reporting: Complete / Incomplete
- Zip file

## If the standard settings don't work

- LMS Reporting
  - Instead of Complete / Incomplete, try Pass / Fail, Completed / Failed, etc
- SCORM Settings
  - SCORM 1.2 (try this with 3rd party content)
  - AICC (try this if the 3rd party SCORM content is hosted remotely)

## Test for compliance

- Use SCORM Cloud
  - Navigate to <https://cloud.scorm.com/>
  - Obtain a free login
  - Upload the zipped SCORM file to test your content on the same SCORM engine that Alchemy uses
- Run in Manager with a test user:
  - Does it run?
  - Does the Resume feature work?
  - Does failing the course result in an In Progress?
  - Does passing the course result in a Complete?
