

# Coaching for Smart Action

## Compliance to Standards

Source: Behavior Change Study

“Coach is essential for our supervisor team. It drives one-on-one time with our employees, and it also drives employee participation and involvement.”

—Gary Burns, Plant Manager,  
Rudolph Foods

Studies show that a combination of effective training, corrective observations, and coaching improves frontline employee compliance to standards by up to 38%.

Alchemy Coach is an award-winning tablet application designed specifically for the food industry. It helps engage your frontline employees and ensures they are following standard operating procedures. Coach also fosters a continuous learning environment and ongoing communications between employees and supervisors.

The Alchemy Coach app is interactive and can be used both online and offline in production areas to:

## Verify Training Effectiveness

- Document on-the-job training and sign-offs
- Ensure SOPs and work instructions are practiced on the floor

## Drive One-on-One Communication

- Provide remediation feedback and sign-offs
- Facilitate supervisor and employee communication

## Perform Observations

- Document and track corrective observations
- Ensure compliance with regulatory requirements
