

# Attain & Sustain Your GFSI Certification

with Expert Consulting & FSQA Management Software Solutions

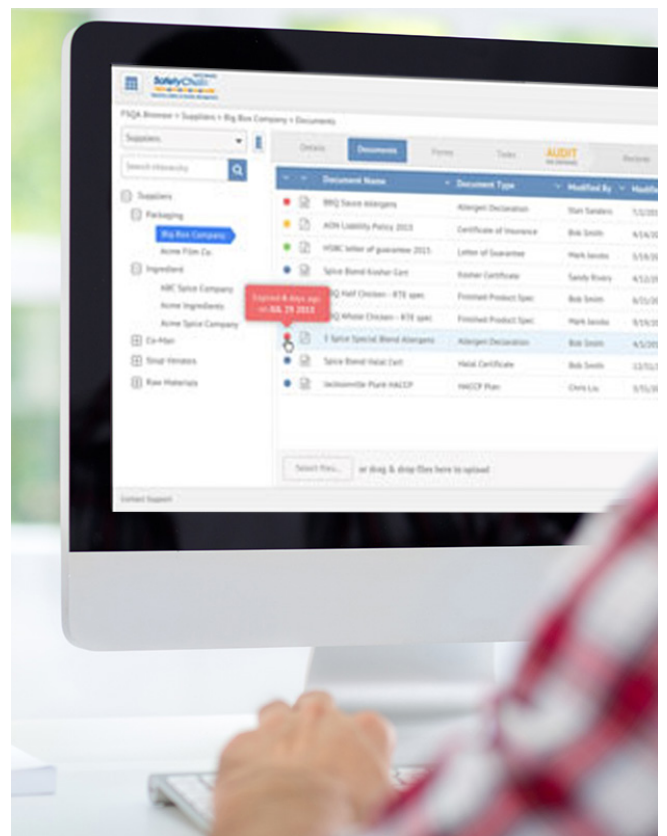

## Rely on Alchemy Consultants to Keep You Audit Ready 24/7

With the Alchemy GFSI Sustainability program, your stake in a demanding SQF, BRC, or FSSC 22000 sustainment effort will not degrade between audits. The program will help you stay audit ready 24/7 with a monthly phone review and advisory sessions with your Alchemy consultant, plus food safety audit and compliance software powered by SafetyChain.

## Food Safety & Quality Management Software for Compliance & Audit Readiness

Alchemy has partnered with SafetyChain Software™ to offer a secure, cloud-based suite to document and control your audit readiness. The software enables your food safety team to:

- **Organize** and manage all compliance requirements (supply chain, customer, quality, food safety) in one system
- **Manage** documents and records electronically
- **Automate** tasks to ensure program execution
- **Evaluate** compliance continuously in real time
- **Readily access** FSQA data to pinpoint challenges and implement timely corrective action
- **Easily trend** program performance to facilitate continuous improvement

## Expert Advice from Experienced Food Safety & Quality Professionals

Monthly phone consultations to help you monitor and sustain the performance of your food safety and quality system with consistent and audit-defensible practices:

- Review past month performance
- Give advice on concerns or issues
- Recognize high-risk incidents and trends
- Increase profitability by reducing cost of quality failures
- Assure systemic sustainment of required programs
- Identify opportunities for continuous improvement
- Assure GFSI audit readiness

## SafetyChain Food Quality Management System

SafetyChain is a Quality Management System (QMS) that helps food companies save time, money and maintain compliance with a user-friendly software platform that captures, manages and analyzes real-time operations data.

- **Save Time:** Leverage easy-to-use tools to capture data and track tasks
- **Save Money:** Lower your cost of quality with real-time data analytics
- **Maintain Compliance:** Easily track your programs and automate your audit process
