

Challenge

- Time consuming training
- Production inefficiencies

Solution

- Standardized training
- Real-time reporting

Result

- **30% increase** in production efficiency
- **\$500,000** annual waste savings
- **Zero** product recalls

“When I look at what the payback is, the Alchemy investment is a no-brainer for us.”

—Randy Josephs,
VP of Operations

About Kisko

The Josephs family founded Kisko Products in 1977. Today, the family-owned business is the largest manufacturer of freeze pops in Canada. The modern, 115,000 square-foot facility produces a variety of freezable kids treats under the Kisko name and other recognized brands.

The Challenge

With a focus on high-quality products, Kisko must ensure safe and productive operations to keep customer satisfaction at its highest.

Much of Kisko's success is attributed to their focus on employee development. "As a company, you can't grow if each person in the company is not being developed," says Vice President of Operations, Randy Josephs.

As a part of its continuous improvement efforts, Kisko looked for opportunities to improve the training program. "Our HR manager and I would spend approximately six hours a day each, for about four and a half months, just to do the training we needed," says Josephs.

Costly resources were also needed for record keeping. "We actually had one and a half people employed full-time, just to do data entry."

Finally, Kisko saw room for improvement in overall production efficiencies through a well optimized workforce. "We needed to see the production efficiency grow based on company targets. Specifically, we were looking for waste reduction and down-time reduction," says Josephs.

The Solution

Kisko turned to Alchemy to help improve operational efficiencies. Alchemy is the leader in frontline worker communications for the food industry. Over three million workers at 50,000 locations use Alchemy's training, coaching, and reinforcement solutions to **reduce workplace injuries, safeguard food, and improve operations.**

Kisko implemented Alchemy programs to build both the knowledge and confidence employees need to consistently work at expert proficiency. A new approach to classroom training incorporated interactive remotes, and gamification to engage employees and test comprehension. The courseware is professionally designed and exclusively focused on the food industry frontline worker. All responses are recorded and securely stored electronically for 24/7 audit-readiness.

"Alchemy has made our training standardized," says QA Manager, Clive Bowen. "We use Alchemy's modules or we can incorporate information specific to Kisko. The quizzes and testing clearly indicate whether or not employees have absorbed what you teach them."

Bowen explains, "When you have been in the food industry for a number of years, you know how important record keeping is. With Alchemy, we are able to digitally access each employee record and verify the training that is delivered."

Josephs also leveraged real-time reporting to aid in operational efficiency, **"Alchemy gave us the ability to do instantaneous analysis** of our different lines, and identify areas where training can improve productivity and yield."

The Result

Kisko experienced dramatic improvements in operational efficiencies with the Alchemy platform. The training enabled frontline employees to engage and connect with the safety and operational needs of the company. **"Our employees now know the impact of downtime and waste,"** says Bowen.

"We saw our production efficiency start to climb," says Josephs. "We literally went from about 68% to 88%. We also reduced over \$500,000 a year in waste."

The standardized training on operating procedures has also reduced downtime. Josephs reports, "Our downtime has also improved. In one department,

Production Efficiency

Reduced Waste Savings

\$500,000 per year

Reduced Downtime

1,300 minutes per month

Downtime Savings

\$60,000 per year

Alchemy has helped us to reduce downtime by 1,300 minutes per month. That equals over \$60,000 in savings."

The Alchemy program significantly reduced the time spent on training for HR and operations. Josephs says, "We used to spend 30% of our time managing training, now it's 10% or less."

"When I look at what the payback is, the Alchemy investment is a no-brainer for us," says Josephs.
